EDUCATION

University of California, Irvine   Irvine, CA
Bachelor of Computer Science   *Expected June 2026*

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Architecture, Machine Learning Fundamentals

TECHNICAL SKILLS

Languages: JavaScript, Java, TypeScript, C++, Python, HTML/CSS
Frameworks/Tools: React, Node.js, Express, Docker, PyTorch, Tailwind CSS, Vite, Chakra UI, Git, Postman, Figma
Cloud / Databases: AWS (EC2, S3, Lightsail), MongoDB, PostgreSQL, Firebase

EXPERIENCE

Software Development Intern   April 2025 – Present
AdamsFoods   *Los Angeles, CA*
- Built B2B wholesale platform using **JavaScript**, **React**, **Node.js**, and **PostgreSQL** with product catalog for **20+** items, admin dashboard, and order processing system, acquiring **10+** new restaurant clients
- Integrated **AWS S3** for file storage and order tracking, reducing processing time by **35%** and facilitating **$10,000+** in wholesale orders

Full-Stack Developer   October 2024 – Present
Commit the Change @ UCI - La Peña Cultural Center   *Irvine, CA*
- Contributed to full-stack development in a **15-person** team for nonprofit cultural center platform using **JavaScript**, **React**, **Node.js**, **Express**, and **PostgreSQL**
- Led migration from paper-based registration to digital system, streamlining class scheduling by **50%** through automated calendar and registration features for **20+** weekly cultural classes

Software Development Intern   June 2024 – September 2024
AdamsFoods   *Los Angeles, CA*
- Engineered full-stack web application (**AWS Lightsail**, **JavaScript React**, **MongoDB**, **Express**) for supply chain management, tracking **300+** products and preventing **$15,000/month** in losses
- Automated inventory processes, replacing handwritten logs and saving **5–7 hours** weekly while eliminating transcription errors
- Led complete development lifecycle including system design and **AWS** deployment

Supply Chain Intern   June 2023 – September 2023
AdamsFoods   *Los Angeles, CA*
- Optimized inventory management processes by digitizing paper records and implementing Excel tracking systems for vendor coordination and logistics workflow documentation
- Analyzed supply chain operations and documented procurement procedures, successfully training new team members on warehouse and distribution protocols

PROJECTS

Homesteadr: Real Estate Management Platform | *Hack@UCI*   2024
- Built React application with Firebase backend connecting **100+** news articles to **50+** real estate listings using Groq AI for location keyword extraction
- Implemented Google Maps API with **150+** custom property markers and created data pipeline processing **1000+** property records

DineSafe: Restaurant Health Inspection Platform | *2nd Place Winner, UCI Hackathon*   2025
- Collaborated in a team of **4** to create a full-stack MERN (MongoDB, Express, React, Node.js) application visualizing health inspection data for **400+** Orange County restaurants
- Developed a Python script utilizing web scraping and OpenAI's GPT API for automated report summarization
- Built interactive map interface with Google Maps API that features real-time geolocation and custom markers
- Implemented RESTful API with Express.js and MongoDB that handled **300+** documents
